

# AX-150

Compact, low cost,  
feature rich ECR  
for hospitality and retail

Amazing value, good looking and reliable,  
the AX-150 provides cost effective control for  
today's busy trading environments.

## Features

### AX-150

Built in PC communications as standard and can be linked to the David Utility for programming and reporting.

The David Utility allows you to programme all aspects of the AX-150 and store that data on your PC for security.

### Easy Roll Change

The hi-tech 'drop and load printer mechanism simplifies and speeds paper roll changes and eliminates paper jams.

### 4-line Alphanumeric Display

The bright alphanumeric multi-line front display and bright single line rear display describe items by name and give user friendly prompts to staff to ease and speed service.

- Simple to use
- Fast, silent printing
- 5,000 Items Price Look Up Memory
- 4 line 24 character operator display
- 58mm alphanumeric receipt printer with electronic journal
- 40 Servers by programmable ID number
- Server interrupt with auto timeout for up to 5 servers
- Training Mode for new staff
- Heavy-duty cash drawer with unbreakable metal note clips
- Password protection for X and Z reports
- Flat water resistant keyboard for fast entry of preset items
- Easy entry of alpha descriptions for departments and PLU's via the alphabetic layout on the flat keyboard

and PIN

Software

Handheld

Peripherals

Multisite

An economic choice for the smaller business, while high specification and superb performance make it equally popular in larger organisations and busy locations.

## Displays

The 4-line 24 character alphanumeric operator display describes all items by name and gives user-friendly prompts to ease and speed service. The single-line LED turret display can be rotated to the best viewing position for the customer.

## Drop and Load Silent Printer

AX-150's hi-tech drop and load printer simplifies and speeds paper roll changes and eliminates the possibility of paper jams. There is no ribbon to replace or fade, so receipts of the same exceptional clarity are produced every time. There is a 5-line header message for your company details and VAT number and a 5-line footer for your sales or thank you message. The electronic journal can be printed automatically at the end of the day with your Z report or on request as required. If an electronic journal is not required it can be switched off.

## Option of Low Cost Scanning

The AX-150's memory can hold up to 5,000 sales items as Price Look Ups. You can enter sales manually on the keyboard by registering the Price Look Up number, or you can scan bar-coded items for high-speed sales. A range of low-cost scanners is available for the AX-150.

## Bar Code Learning

If you come across an unprogrammed item - even in the middle of a sale - 'Enter Price + Linked Dept' appears on the screen. After you enter the price and press the department, subsequent sales of the item will scan, showing the price and department name. Bar code names and prices can also be entered by PC.

## Server Interrupt

Five servers can use the AX-150 concurrently to avoid queue build-up. If a server leaves an unfinished order on display, it is automatically stored and brought back when the original server enters his ID number. Alternatively unfinished orders can be automatically stored after a pre-programmed number of seconds.

## Features for Hospitality

The AX-150 has a 106 button flat keyboard allowing more than 70 preset priced items for fast 'one touch' entry. The optional 'DAVID' utility can be used by you or your dealer to design, colour and layout the keyboard. The 'DAVID' software can also collect reports in-house or remotely via modem.

Distribution throughout the United Kingdom and Republic of Ireland by the appointed Dealers of Geller Business Machines, Greenford, Middlesex, England. The information given in this leaflet is subject to change without notice and does not represent a commitment on the part of Geller Business Machines

## Powerful Management Reporting

A choice of thirteen management reports is available daily and periodically to provide the information you need to control your business. Five Display Only reports (flash reporting) are also available.

## Some of the many important features:

- 40 Servers by programmable ID number
- Compulsory Server ID
- 5,000 Price Look Ups
- Flat 'soft' keyboard permits 70+ preset items and chosen layout and functions
